

NEW ON-BOARD CAMERA RULES EFFECTIVE 8-1-11

The issue of the use and mounting of on-board cameras continues to be a problem. Improper mounting, loss on the track, and difficulty in determining ownership are among the issues present. Accordingly SKUSA is establishing the following regulations, effective 8/1/11:

- 1) The only cameras currently approved are the **GoPro HD Motorsports HERO** camera (product information available at www.goprocamera.com) and the **SmartyCam** (product information at www.aimsports.com). Other models of cameras may be submitted for approval prior to their use.
- 2) Under no circumstances will cameras be allowed on your person or on helmets.
- 3) Each camera must be identified with the owners name and contact information (cell phone). Cameras without identification may not be returned.
- 4) If the camera becomes detached, involved in or creates an incident, penalties – including loss of positions, loss of points or monetary penalties – may be assessed.
- 5) Any camera mounting is subject to inspection by tech personnel and removal if not acceptable.

GoPro Mounting

Following are the mounting instruction which is the **ONLY** allowed location and mount on the kart. Failure to follow these instructions will result in removal of the camera.

Only one camera can be mounted on a kart installed as indicated below. It is not permitted to mount a camera on any other location other than shown below.

The mounting location is on the front panel. The installation kit must be fixed horizontally, in the middle of the panel, and between 300 mm (11.810") and 400 mm (15.748") from the upper edge.

- 1 camera housing with support
- 2 M5x16 screws
- 2 washers
- 2 self-locking nuts

The only mount mechanism to be used is the portion of GoPro GRBM30 Roll Bar Mount kit shown by the arrow.

SmartyCam Mounting

The only approved mounts are as follows with the retention strap (tether) installed. Instructions are supplied with the mount. **They may be mounted only on the main frame or welded seat mount bar.**

P/N Description:

- RAM-B-108BU "V" bracket roll bar mount
- RAM-B-231Z-2 "U" bracket roll bar mount (**Strongly recommended**)
- RAM-B-201U-C 6" Double socket arm
- X90KSSMCC Anti-vibration cot-style mount
- RAM-B-237U 1" mounting ball w/ 1/4" -20 alum. stud

Note the tether bracket is attached to the SmartyCam and should be secured to the frame or seat mount of the kart using throttle cable and clamp.

Images of these mounting kits are available on the SmartyCam website: <http://smartycam.com/on-board-camera/accessories-bracket-kits.htm>.
